

Day-2 Task

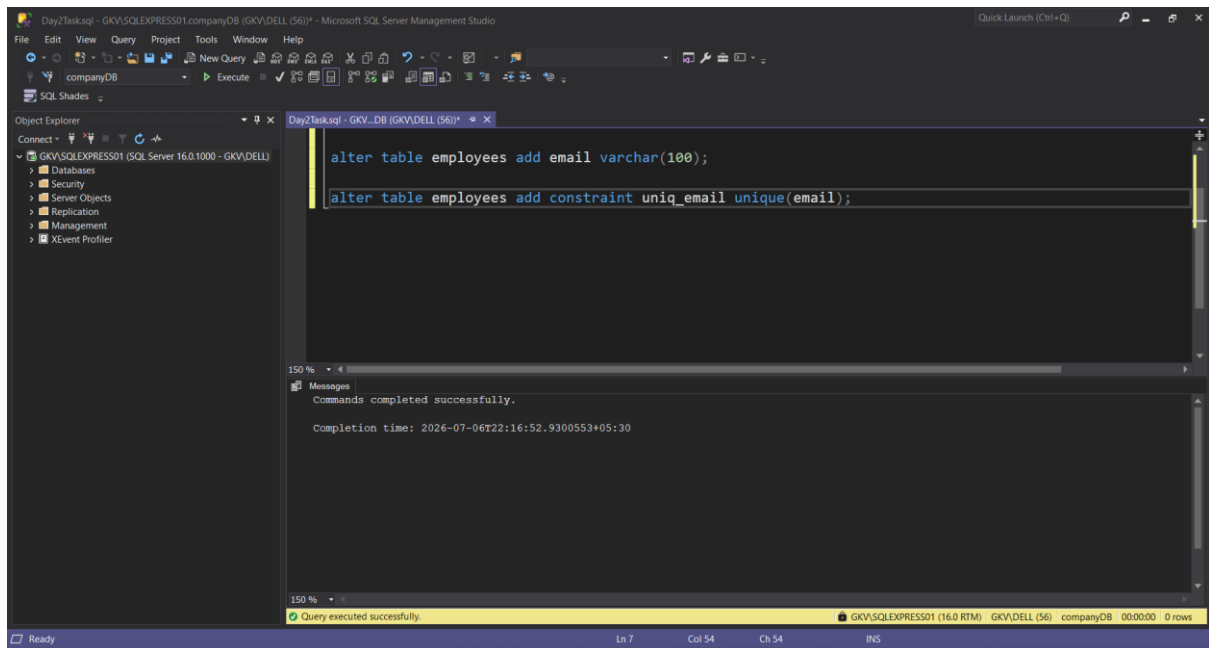

1. Create a database companyDB.

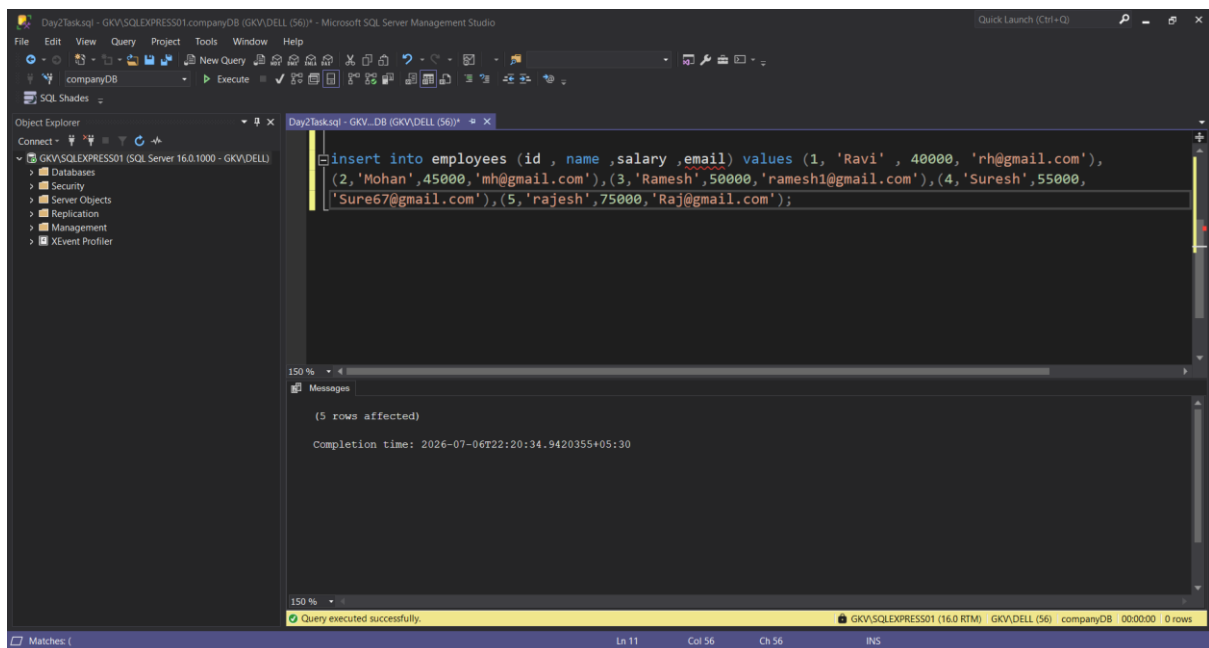

2. Create a table employees with constraints: id (PRIMARY KEY), name (NOT NULL), salary (DEFAULT 30000).

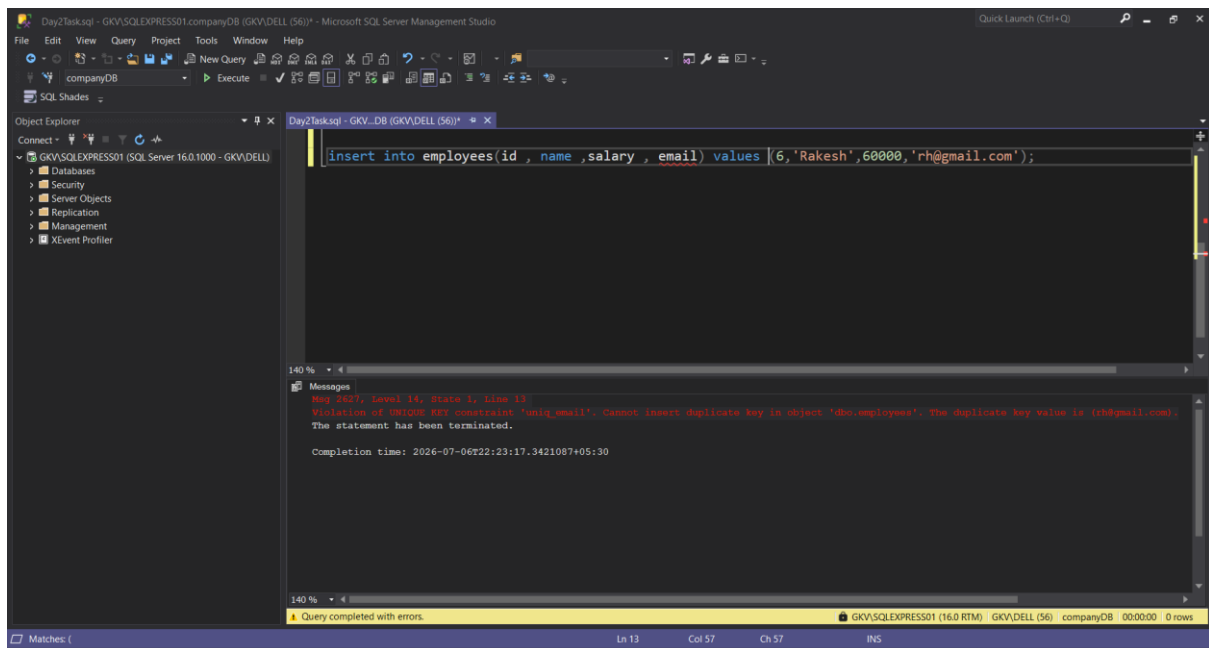

3. Add a UNIQUE constraint on email.

4. Insert 5 employee records.

5. Try inserting a duplicate email to see the error.

6. Drop the table and recreate it with CHECK constraint for salary > 0.
