

Day-5 Task

1. Create a table orders (id, product_name, quantity, price).

2. Insert 5 orders with different values.

3. Select all orders where quantity > 2.

The screenshot shows the Microsoft SQL Server Management Studio interface. The query editor contains the SQL statement: `select * from orders where quantity>2;`. The query has been executed successfully, and the results are displayed in a table with 4 rows. The status bar at the bottom indicates "Query executed successfully." and "4 rows".

	product_name	quantity	price
1	Balls	5	1000
2	Stumps	6	500
3	Balls	4	250
4	Armguard	10	600

4. Select orders where price is between 100 and 500.

The screenshot shows the Microsoft SQL Server Management Studio interface. The query editor contains the SQL statement: `select * from orders where price between 100 and 500;`. The query has been executed successfully, and the results are displayed in a table with 3 rows. The status bar at the bottom indicates "Query executed successfully." and "3 rows".

	product_name	quantity	price
1	Balls	1	150
2	Stumps	6	500
3	Balls	4	250

5. Fetch orders with product_name starting with 'A'.

6. Fetch orders sorted by quantity in descending order.
