

Day-4 Task

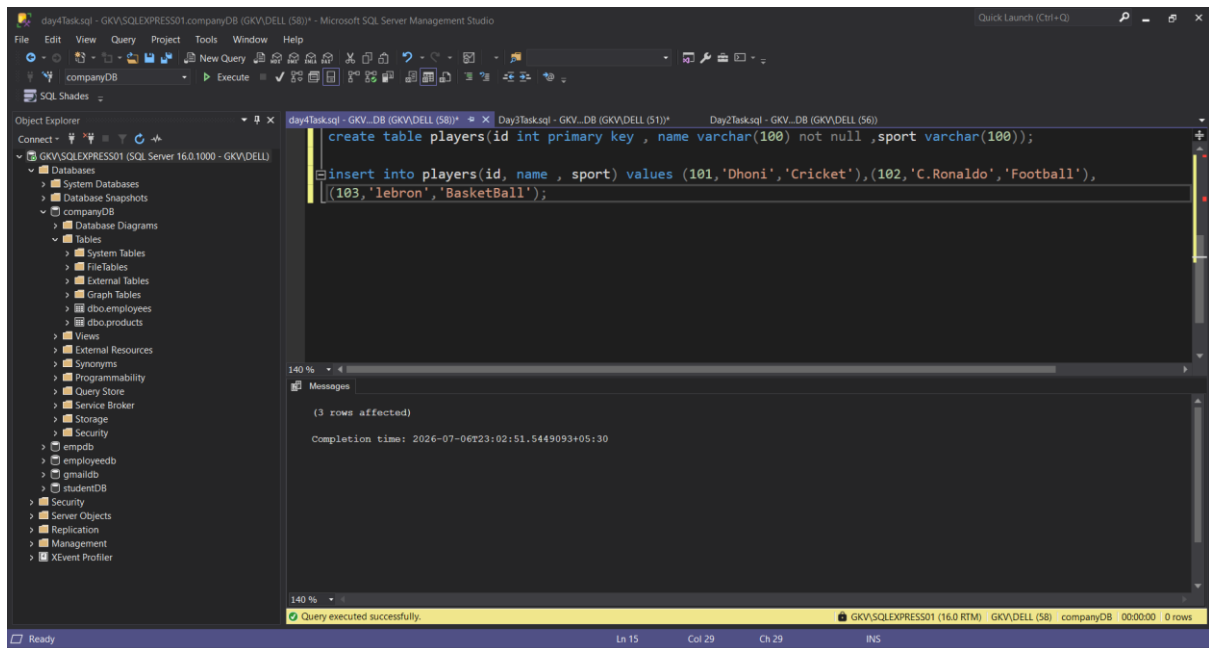

1. Try to add multiple constraints like "unique" and "check" for a single column named "Age" after creating a table "Student".

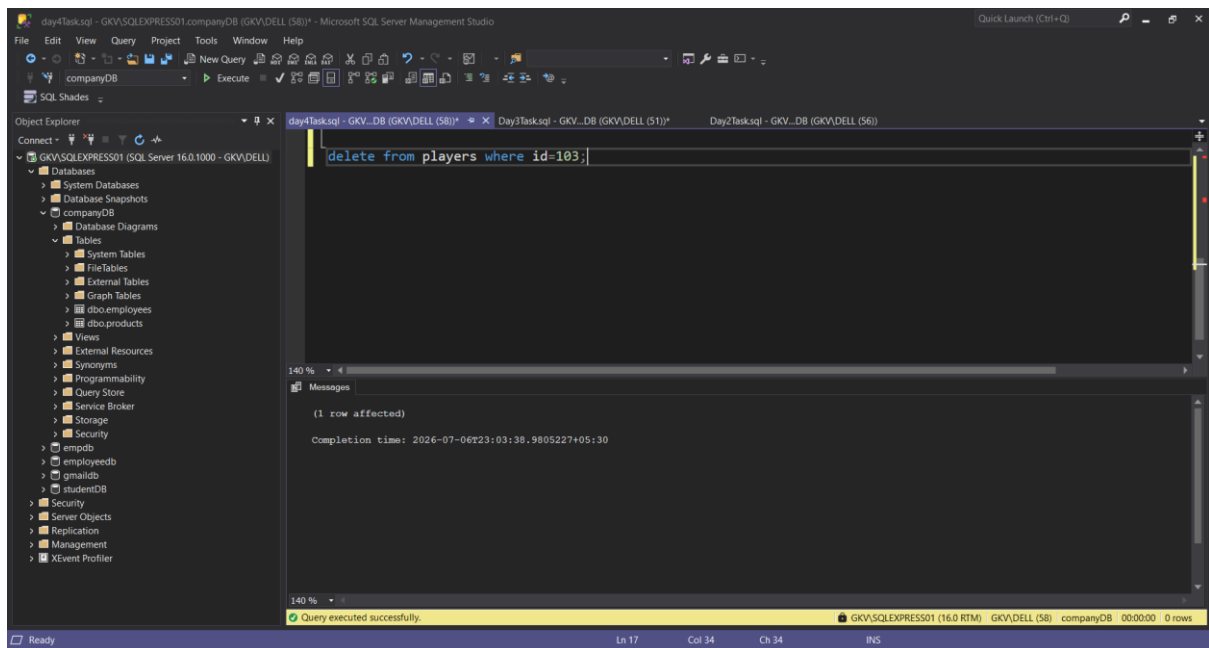

2. Create a table employee with columns id, name, gender, age, blood group and salary. After creating, try to remove the column 'age'.

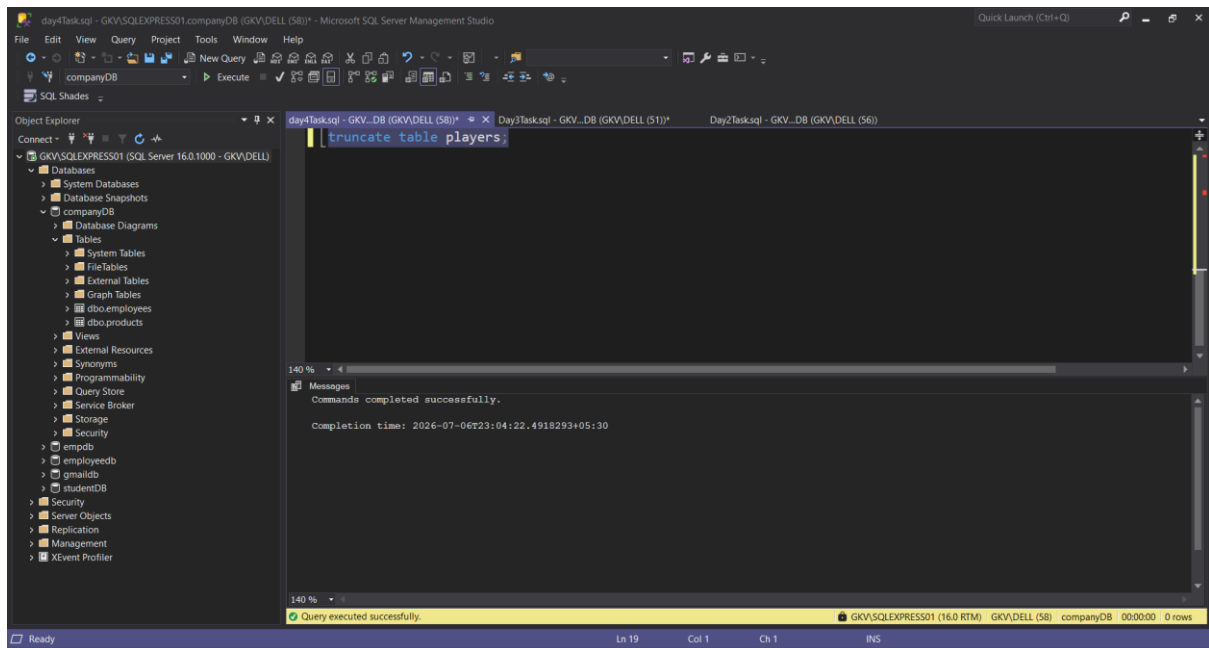

3. Create any table, insert three rows.

a. Then delete a particular row.

b. Then truncate the table.

c. Finally drop the table.
